REGVIN VINOD KUMAR

AI & Machine Learning Engineer

regvinvk@gmail.com | +91 8078851881

PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with hands-on experience building and deploying ML/DL, NLP, computer vision, and time-series forecasting solutions. Skilled in end-to-end ML pipeline development, model deployment, and LLM integration (OpenAI, Gemini, Claude, Mistral) using AI agent frameworks (LangChain, CrewAI). Proficient in Python, TensorFlow, PyTorch, Scikit-learn, FastAPI, and SQL, with practical experience in XGBoost, regression, clustering, feature engineering, and MLOps. Applied AI to pricing prediction, financial forecasting, speech analysis, and real-time object detection, with additional experience in BI and data visualization (Tableau, Power BI) for decision support.

TECHNICAL SKILLS

- **Languages:** Python, C, SQL, React
- **ML/DL Frameworks:** TensorFlow, PyTorch, Scikit-learn, XGBoost
- **AI/LLM Tooling:** OpenAI, Google Gemini, Anthropic Claude, Mistral, LangChain, CrewAI, RAG, Pinecone, n8n, quantized model integration (Qwen)
- **ML Techniques:** NLP, computer vision, predictive analytics, time-series forecasting, regression, clustering, feature engineering, neural networks
- **Deployment & Backend:** FastAPI, MLOps, model deployment, Linux, kernels & drivers, database management, computer networks
- **Data Visualization:** Tableau, Power BI

EXPERIENCE

AI Engineer / Developer — GoBlue International FZC **03/2026 – Present**

Software Engineer Intern — Sasken Technologies, Bengaluru **02/2025 – 05/2025**

Software Programming Intern (Python) — Softora Technologies Pvt. Ltd., Bengaluru **02/2023 – 03/2023**

PROJECTS

AUTO-RAG Customer Support Assistant 08/2025

- Built an AI-powered customer service automation system in n8n, integrating Google Gemini (PaLM) and a Pinecone vector database to deliver Retrieval-Augmented Generation (RAG)-based email responses.
- Designed intelligent email classification and retrieval workflows that automatically detect customer queries, surface relevant policy data, and generate contextually accurate responses in real time.
- Improved support efficiency and response accuracy through automated LLM-driven communication, semantic search, and vectorized knowledge retrieval, reducing manual workload and improving SLA compliance.

Predictive Analysis & Trend Forecasting using Generative AI 11/2024

- Produced stock forecasts and evaluated quarterly performance indicators using generative AI techniques.
- Delivered a user-friendly HTML interface and Power BI/Tableau-style dashboards to visualize forecasts.
- Integrated SMS-based alerts to notify users of stock price changes in real time.

Anti-Theft Home Automation System 06/2024

- Implemented a home automation and intrusion-detection system using an ESP32 microcontroller and a piezoelectric sensor, capturing images of intruders when a threshold was exceeded.
- Built SMS-based user notifications and an alternate GUI for real-time monitoring.

Problematic Speech Detection 06/2024

- Built a speech classification system to detect problematic or hate-spreading language, categorizing input audio as positive or negative.
- Designed the system for integration into prompt-engineering or transformer pipelines to support ethical speech propagation.

Stock Price Prediction Model 09/2023

- Developed a machine learning model to predict stock prices from historical data.

- Generated graphical representations of computations and predictions for analysis.

Interactive Interface for Sports Statistical Database 09/2023

- Created and maintained a sports statistics database with a Java-based GUI for querying and retrieving records.

Data Visualization — Weather Dataset 04/2023

- Built Power BI and Tableau dashboards presenting graphical analysis of a weather dataset.
- Applied forecasting techniques to dynamically generated data to enhance analytical depth.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning **2021 – 2025**

N.M.A.M. Institute of Technology, Nitte | CGPA: 8.31

- Relevant coursework: Artificial Intelligence, Machine Learning, Deep Learning, Operating Systems, Natural Language Processing, Algorithms.

AISSCE / 12th Grade — The Indian School Bahrain **2021**

Percentage: 85.2%

AISSE / 10th Grade — The Indian School Bahrain **2019**

Percentage: 86.6%

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco (credential: credly.com/badges/c57f7979-e725-45e8-ab5d-7ea2857fc150)

ACTIVITIES

- Member, College Football Team
- Active volunteer for department-level hackathons and events
- Committee member for various sporting events
- Media Committee member (Photography) for various college-level events

INTERESTS & LANGUAGES

Interests: Football, Photography
Languages: English, Malayalam, Hindi
